Course Description:

In this course, we will study the theories, policies, and institutions of international transfully or easily analyzed in a

-semester course. They do,

however, lend themselves extremely well to critical thinking and rational inquiry, which are the guiding principles of this course. Our goal is to become and remain informed about issues related to international trade and, even more importantly, acquire the ability to think about complex issues in a logical objective manner. Thinking critically is what permits us to differentiate between the illogical and the sensible, between the misleading use of statistics, misleading anecdotal evidence, and the reasonable presentation of information.

Prerequisites:

Students must have completed ECON 3070. It is NOT sufficient to take these courses concurrently. I assume that you did not only take the class, <u>but also that you understand and remember the content</u>. The prerequisites must be strictly enforced.

Readings:

We will be using Markusen and Maskus, *International Trade: Theory and Evidence*, Wiley Publishers, 2012. Note that this book is not yet in print. Professor Markusen has been kind enough to have the CU bookstore duplicate and bind chapters 1-20 for us, which are on sale there at cost: no

Material from a Missed Lecture: If you miss a class, you are responsible for obtaining notes from a classmate and reading the relevant material in the textbook. I encourage you to come to
