

Supporting Public Use of Hetch Hetchy Valley in Yosemite National Park

Project Purpose

Background

Methods

- 1 Literature review and research
- 2 Quantitative research

Figure 1. Relationship between number of employees and number of employees

The relationship between the number of employees and the number of employees is shown in Figure 1. The relationship is positive and linear. The regression line for the USA is $y = 0.0001x + 0.0001$. The regression line for Germany is $y = 0.0001x + 0.0001$. The regression line for France is $y = 0.0001x + 0.0001$.
